

Outward activity of multinationals by industrial sector (manufacturing) - ISIC Rev 3

■ Database Specific

■ Abstract

This table contains figures on the activity affiliates located abroad by industry according to the International Standard Industrial Classification (ISIC Revision 3).

■ Unit of measure used

The units used to present data in AFA are **millions of national currency** for monetary variables and **units** for the other variables. Monetary variables are in current prices. **Euro-area countries:** national currency data is expressed in euro beginning with the year of entry into the Economic and Monetary Union (EMU). For years prior to the year of entry into EMU, data have been converted from the former national currency using the appropriate irrevocable conversion rate. This presentation facilitates comparisons within a country over time and ensures that the historical evolution is preserved. Please note, however, that pre-EMU euro are a notional unit and should not be used to form area aggregates or to carry out cross-country comparisons.

■ Population & Scope

■ Geographic coverage

In principle, the ultimate controller should be considered, but in some countries it is the immediate controller.

■ Concepts & Classifications
