

Country statistical profiles

▣ Concepts & Classifications

The country statistical profiles provide a broad selection of indicators, illustrating the demographic, economic, environmental and social developments, for all OECD members. The dataset also covers the five key partner economies with which the OECD has developed an enhanced engagement program with (Brazil, China, India, Indonesia and South Africa) ,accession countries (Colombia, Costa Rica and Lithuania) , Peru and the Russian Federation. The user can easily compare indicators across all countries.

▣ Other Aspects

▣ Other comments

Data and metadata published in the Factbook 2015/2016 are available in print and as a webbook.
