

LFS - Sex and Age

■ Data Characteristics

■ Unit of measure used

Persons

■ Power code

Thousands

■ Population & Scope

■ Statistical population

This table contains labour force data on labour market status - population, labour force, unemployment and employment - by sex and by detailed age groups and standard age groups (15-24, 25-54, 55-64, 65+, total).

Note: Population figures reported in table *LFS by sex* are Census-based, while the data for this table are taken from labour force surveys.

■ Geographic coverage

In order to facilitate analysis and comparisons over time, historical data for OECD members have been provided over as long a period as possible, often even before a country became a member of the Organisation. Information on the membership dates of all OECD countries can be found at OECD Ratification Dates.

- **OECD Ratification Dates**

■ Concepts & Classifications

■ Key statistical concept

Information for all countries and all LFS subjects may be found in the attached file : www.oecd.org/els/employmentpoliciesanddata/LFSNOTES_SOURCES.pdf.
