

## 5. Final consumption expenditure of households

### ■ Unit of measure used

In national currency, in current prices and constant prices (national base year, previous year prices and OECD base year i.e. 2010). Expressed in millions.

For the Euro area countries, the data in national currency for all years are calculated using the fixed conversion rates against the euro.

### ■ Statistical population

It presents the final consumption expenditure of households broken down by the COICOP (Classification of Individual Consumption According to Purpose) classification and by durability.

It has been prepared from statistics reported to the OECD by Member countries in their answers to annual national accounts questionnaire.
