

6. Value added and its components by activity

■Data source(s) used

In July 31st, 2013 the United States released their new set of national accounts according to 2008 SNA. However, the entire set of data are not yet available.

- **For more information**

■Unit of measure used

In national currency, in current prices and constant prices (national base year, previous year prices and OECD base year i.e. 2010). Expressed in millions.

For the Euro area countries, the data in national currency for all years are calculated using the fixed conversion rates against the euro.

■Statistical population

It presents output, intermediate consumption and the gross value added and its components, in particular compensation of employees and gross operating surplus and mixed income, broken down by detailed industries.

It has been prepared from statistics reported to the OECD by Member countries in their answers to annual national accounts questionnaire.

Data presented in this table will not be updated after summer 2010. Data reported to the OECD by countries in their answers to the annual national accounts questionnaire are now available on theme Industry and Services, Structural Analysis (STAN) Databases.
