

## LFS - Average usual weekly hours worked on the main job

### ■ Data Characteristics

#### ■ Unit of measure used

Hours

#### ■ Power code

Units

### ■ Population & Scope

#### ■ Statistical population

This table contains data on average usual weekly hours worked in the main job broken down by total employment, full-time employment and part-time employment. Actual hours of work instead of usual hours of work are only available in some countries (Mexico and Korea). Data are further broken down by professional status - employees, total employment - by sex and standardised age groups (15-24, 25-54, 55-64, 65+ and total).

#### ■ Geographic coverage

*In order to facilitate analysis and comparisons over time, historical data for OECD members have been provided over as long a period as possible, often even before a country became a member of the Organisation. Information on the membership dates of all OECD countries can be found at OECD Ratification Dates.*

- **OECD Ratification Dates**

### ■ Concepts & Classifications

#### ■ Key statistical concept

Part-time employment is defined according to a common definition of less than 30-weekly-usual hours worked in the main job.

Full-time employment is defined according to a common definition of more than 30-weekly-usual hours worked in the main job.

Information for all countries and all LFS subjects may be found in the attached file : [www.oecd.org/els/employmentpoliciesanddata/LFSNOTES\\_SOURCES.pdf](http://www.oecd.org/els/employmentpoliciesanddata/LFSNOTES_SOURCES.pdf).
