

### Revenue Statistics

OECD's annual statistical publication that presents a unique set of detailed and internationally comparable tax revenue data in a common format for all OECD countries from 1965 onwards. It also provides a conceptual framework defining which government receipts should be regarded as taxes and classifies different types of taxes. Comparable tables show revenue data by type of tax in US dollars, as a percentage of GDP, and, for the different types of taxes, as a share of total taxation. Detailed country tables show information in national currency values.

### ■ Direct source

Country representatives on the OECD Working Party 2: Tax Policy and Tax Statistics of the Committee on Fiscal Affairs.

### ■ Source metadata

Detailed information on the coverage, basis of reporting and classification of taxes included within the dataset can be read at:

- **The OECD classification of taxes and interpretative guide**

### ■ Variables collected

Data on government sector receipts, and on taxes in particular, are basic inputs to most structural economic descriptions and economic analyses and are increasingly used in international comparisons. This annual database presents a unique set of detailed and internationally comparable tax data in a common format for all OECD countries.
