

1. Gross domestic product (GDP)

■ Unit of measure used

In national currency, in current prices and constant prices (national base year, previous year prices and OECD base year i.e. 2010). For comparative purposes in US \$ current prices and constant prices, using exchange rate and for the GDP by expenditures (in absence of specific PPP series) GDP PPPs for all series except actual individual consumption where a specific PPP is used. Expressed in millions and in indices. For the Euro area countries, the data in national currency for all years are calculated using the fixed conversion rates against the euro.

■ Statistical population

It presents the three approaches of the GDP: expenditure based, output based and income based.

It has been prepared from statistics reported to the OECD by Member countries in their answers to annual national accounts questionnaire.
